

Do you want to improve your operational performance by 15%?

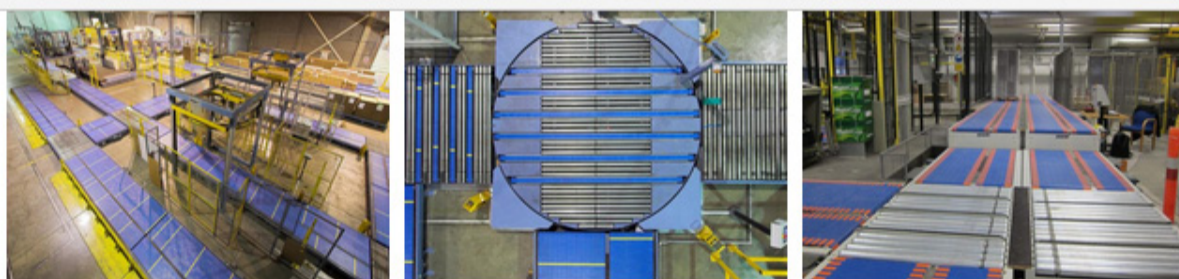

At Avanti, we know that choosing conveyerisation is not a decision you take lightly. When you make the choice to invest in a conveyor system, we know that you want to be 100% sure that the results will be worth it.

We surveyed a number of our customers recently and asked them precisely what Return On Investment (R.O.I.) they looked for when installing a conveyor system.....

.....here are some of the R.O.I. results and outcomes that our customers have achieved.

How our conveyor systems have delivered tangible cost savings

- **Labour costs reduced.** "With the eradication of the need for fork lift truck drivers we saved between £18,000 and £30,000 per annum".
- **Waste levels down.** "We saved 1% on waste reduction, which equated to £120,000 in just one year".
- **Health and safety incidents down.** "Conveyorisation meant fork lift activities being segregated from people working in the factory, this in turn led to fewer accidents and LTAs (Lost Time Accidents), significantly reducing both health and safety costs as well as our insurance costs".
- **Redeployment of staff.** "The FLT drivers were able to be re-trained and were moved on to production machines instead, this supported our sales growth plans and avoided additional recruitment costs".

How our conveyor systems have helped increase productivity

- **Eliminated bottlenecks.** "Typically we had 2 to 3 hours machine downtime a day due to conveyor bottlenecks. Our new conveyor system freed up jams and increased the rate of production output".
- **Faster palletisation.** "Goods are now palletised much quicker and dispatched even faster, increasing production output and our OTIF (On Time In Full) score".
- **Quicker conversion.** "Our Stedi-Stack conveyor system means we can now keep up with our high output converting machines.....at last!"

For help moving forward with your investment plans and to **secure sales growth, labour savings** and **waste reduction** why not call our Sales Director, Ian Drummond-Smillie, or one of our other friendly team today on **01663 740011** or via email on sales@avanti-conveyors.co.uk and ensure conveyerisation helps your business achieve the right returns on your investment.
